**National Oil and Hazardous Substances Pollution Contingency Plan;**

**National Priorities List:**

**Partial Deletion of the Vasquez Boulevard and I-70 Superfund Site**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** The Environmental Protection Agency (EPA) Region 8 announces the deletion of the operable unit 1 (OU1) of the Vasquez Boulevard and I-70 Superfund Site (Site) located in the City and County of Denver, CO, from the National Priorities List (NPL). The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). This partial deletion pertains only to OU1, the residential portion of the Site. The operable unit 2 (OU2) and operable unit 3 (OU3) will remain on the NPL and are not being considered for deletion as part of this action. The EPA and the State of Colorado, through the Colorado Department of Public Health and Environment (CDPHE), have determined that all appropriate response actions under CERCLA, other than operation and maintenance, monitoring and five-year reviews, have been completed. However, the deletion of these parcels does not preclude future actions under Superfund.

**DATES:** This action is effective [Insert date of publication in the Federal Register.]

**ADDRESSES:** EPA has established a docket for this action under Docket Identification No.

EPA-HQ-SFUND-1999-0010. All documents in the docket are listed on the [ HYPERLINK

**SUPPLEMENTARY INFORMATION:**

The portion of the site to be deleted from the NPL is: the residential portion of the site, identified as OU1, of the Vasquez Boulevard and I-70 Superfund Site, Denver CO. A Notice of Intent for Partial Deletion for this Site was published in the **Federal Register** (84 FR 2116) on February 6, 2019.

The closing date for comments on the Notice of Intent for Partial Deletion originally was March 8, 2019; this date was extended to April 8, 2019. Twenty-seven public comments were received and expressed concerns about non-Superfund projects in the area, the extent of the remedy, and the source of the contaminants. The non-Superfund projects in the area are overseen by other agencies. The properties that were remediated under the Superfund process do not have additional restrictions placed on them. EPA investigations identified sources of contamination and the residential properties that needed cleanup. The remedy implemented removed the contaminants associated with the site. A responsiveness summary was prepared and placed in both the docket, EPA-HQ-SFUND-1999-0010, on [ HYPERLINK "http://www.regulations.gov" ], and in the local repositories listed above.

**Commented [SC3]:** Needs text below to show these comments were addressed.

**Commented [SC4]:** Text added.

EPA maintains the NPL as the list of sites that appear to present a significant risk to public health, welfare, or the environment. Deletion of a site from the NPL does not preclude further remedial action. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system. Deletion of portions of a site from the NPL does not affect responsible party liability, in the unlikely event that future conditions warrant further actions.
